SAMPLE

PMFBY in Patna District

Patna is the capital of Bihar State and has 23 blocks. Besides Patna town and adjoining areas, we have big population of farmers and cultivable land . The District is benefitted by availability of water of rivers like The Ganges, Punpun and Sone. Some of the western parts of Patna like Paliganj, Bikram, DulhinBazaar, Naubatpur, Masaurhi, Bihta etc are part of the rice bowl area of the state. We have surplus production of Paddy, but we have subsistence level of Wheat Production. We have other crops like maize and vegetable also.

Our state's economy is primarily agriculture based economy and Patna is a part of it. On the one hand, we have advantage of having river water for irrigation, on the other hand there has been great concern of regular threat of flood and inundation. Besides floods, we face regular threats of, drought, natural calamities like hailstorm, fogs etc. Crop loss has been a big issue for the agri-economy of the District. In the past, many crop insurance Schemes like NAIS, MNAIS, weather based crop insurance were implemented in the district, but they neither relieved nor attracted the farmers of the District. Reasons being same which has been observed at national level. Such reasons are caps on sum assured, high level of premium, slow claim process, corruption in the system, non-coverage of claims during pre harvesting, post-harvesting seasons etc.

PMFBY was launched from April 2016 and accepted by Bihar after some months in 2016. The scheme brought cheers on the faces of the farmers of the District, because it takes care of most of the bottlenecks faced earlier .PMFBY 2016 has uniform kharif premium of 2 % / Rabbi premium of 1.5 % of SA and 5% premium for annual commercial and horticultural produce. It covers pre-harvesting/ post harvesting and localized calamities losses.

Patna District administration identified the four key areas before going for implementing the PMFBY. Firstly, The District Level Technical Committee (DLTC) was asked to analyse the scale of financing Process. Scale of Finance was decided very meticulously after analyzing the cost of inputs involved in Production. Scale of Finance in adjoining Districts were also analyzed and services of NABARD officers for deciding the Scale of Finance was taken. Secondly, The earmarked Insurance Company was asked to advertise the scheme properly. They were further directed to process the claims swiftly. Thirdly Bankers were warned and monitored for not posing any problems to the farmers who wish to get insured their crops. They were further directed to send the premium and papers to the insurance company within the stipulated deadline. Fourthly, the crop cutting team was provided with latest gadgets and were given vigorous training to use it effectively. The crop cutting team was strictly directed to do all the crop cuttings in the most transparent manner with prior intimation to farmers of the area.

Technology is being adopted in a big way for crop cutting experiments with photography and videography. Krishi Samanvayak, Statistical Officers and Block Agriculture Officers are doing crop cutting with latest gadgets. Personal participation of Shri Sanjay Kumar Agrawal, IAS, DM, Patna in crop cutting experiments in some Panchayats of the District is an example how the District is committed towards successful implementation of PMFBY and motivating the farmers of the District to go to the banks for getting insured under PMFBY. He personally encouraged the farmers of the state for sowing marigold in selected pockets because there is huge gap in demand supply of marigold flowers in Patna. Entire data is being uploaded on the national portal meant for crop insurance. Farmers data base are being maintained online on national portal. To avoid delay in settlement of claim process all Banks and Insurance company are being closely monitored. The District Magistrate has additionally roped in DDC (District Development Officer) of the District to regularly monitor the agencies involved in it. The

District has benefitted by regular TV ads and Newspaper Ads by the State Government. Insurance companies and Banks have also been directed to advertise vigorously. Agriculture and Statistical Departments have organized Technical Trainings sessions/workshops and meetings for successful implementation of PMFBY. After State level training programme, The District Level Training Programme and Block level training Programme is Processing. Latest gadgets have been made available to personnel's involved in crop cutting.

As per Provisional data received from LDM in last year farmers covered under kharif crop insurance was 31110 and under PMFBY the number of farmers covered in Rabi 2016 has gone up to 57850 which is almost farmer families of the District. We hope to cover more than 50% of the District within next two years. Total 31110 Farmers have been covered under the statement. It is likely to increase.

In nutshell, it can be said that the performance of crop insurance scheme is steady in the District and is progressing. Efforts are being made to find out commercially viable crops, vegetables and flowers (such as marigold) , which is also beneficial to the farmers. Consideration is being given to shift from individual crops to group of crops to get wider and stable results. PMFBY will undoubtedly give a boost to the agri-economy of the District and bring smiles on the faces of farmers of the District.
